# Presets

The **Presets** page under **Workflow** provides an overview of the presets stored on the flexAI system and allows them to be imported, exported, and deleted.

The screenshot displays the Jünger AI Xpress interface. The sidebar on the left contains navigation links: Audio Processing, Routing, Interfaces, Sync, Workflow, Presets (selected), System, Network, Certificates, Update, Logging, Licensing, Info, Users, Storage, Terminal, Backup / Restore, and Power. The main content area is titled 'Workflow Presets' and features two buttons: 'EXPORT ALL PRESETS' and 'IMPORT PRESETS'. Below these is a table of presets:

| NAME                                                | DESCRIPTION | TYPE             | SUB-TYPE   |
|-----------------------------------------------------|-------------|------------------|------------|
| <input checked="" type="checkbox"/> Bus Compression |             | Processing Block | Compressor |
| <input checked="" type="checkbox"/> News Reader     |             | Processing Block | Compressor |
| <input type="checkbox"/> Gentle -23                 |             | Processing Block | Compressor |
| <input type="checkbox"/> Super Gentle               |             | Processing Block | Compressor |
| <input type="checkbox"/> Music Mastering 1          |             | Processing Block | Compressor |
| <input type="checkbox"/> Mixed Speech               |             | Processing Block | Compressor |
| <input type="checkbox"/> Music Mastering 2          |             | Processing Block | Compressor |
| <input type="checkbox"/> D02 Original               |             | Processing Block | Compressor |
| <input type="checkbox"/> Noise Gate                 |             | Processing Block | Expander   |
| <input type="checkbox"/> News Reader                |             | Processing Block | Expander   |
| <input type="checkbox"/> D02 Expander               |             | Processing Block | Expander   |
| <input type="checkbox"/> Mixed Speech               |             | Processing Block | Expander   |
| <input type="checkbox"/> Auto Main 2                |             | Processing Block | Fail Over  |
| <input type="checkbox"/> Auto Main 1                |             | Processing Block | Fail Over  |

At the bottom of the table area is a button: 'DELETE SELECTED PRESETS'.

The preset list shows the **Name**, optional **Description**, **Type**, and **Sub-Type** of each preset. This makes it easier to identify which part of the system or processing function a preset belongs to.

Click **Export All Presets** to export the complete preset collection.

Use **Import Presets** to import presets from a previously exported preset file.

Individual presets can also be exported using the export button at the right-hand side of the corresponding entry.

To remove presets, select one or more entries using the checkboxes and click **Delete Selected Presets**.
