

Headphone

The **Headphones** page provides level control for the system's headphone output.

Headphone Level

Parameter	Values	Default	Description
Gain	-80 dBFS to -18 dBFS; up to 0 dBFS with High Gain enabled	-	Sets the headphone output level. With High Gain disabled, the available range is -80 dBFS to -18 dBFS .
Enable High Gain	On / Off	-	Extends the available gain range up to 0 dBFS .
