Users

Current Scope

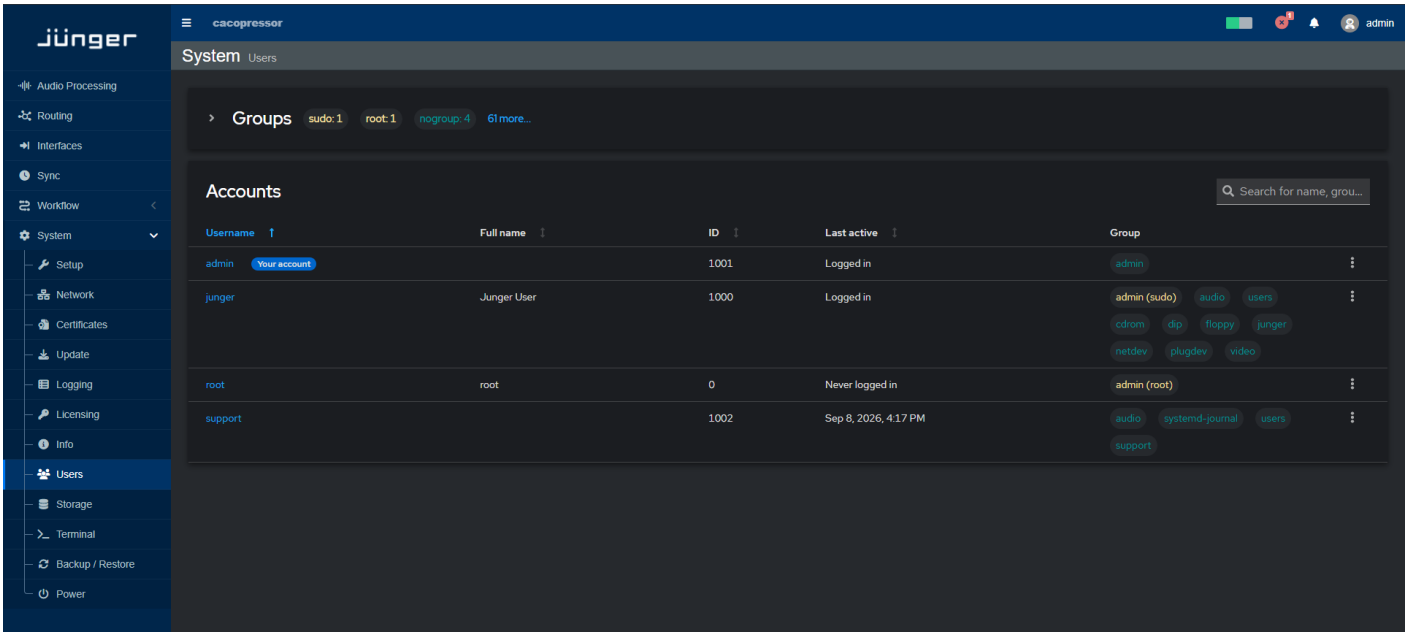

The current flexAI version provides only a limited set of user management functions. At this stage, user administration is mainly intended for basic account access and password handling.

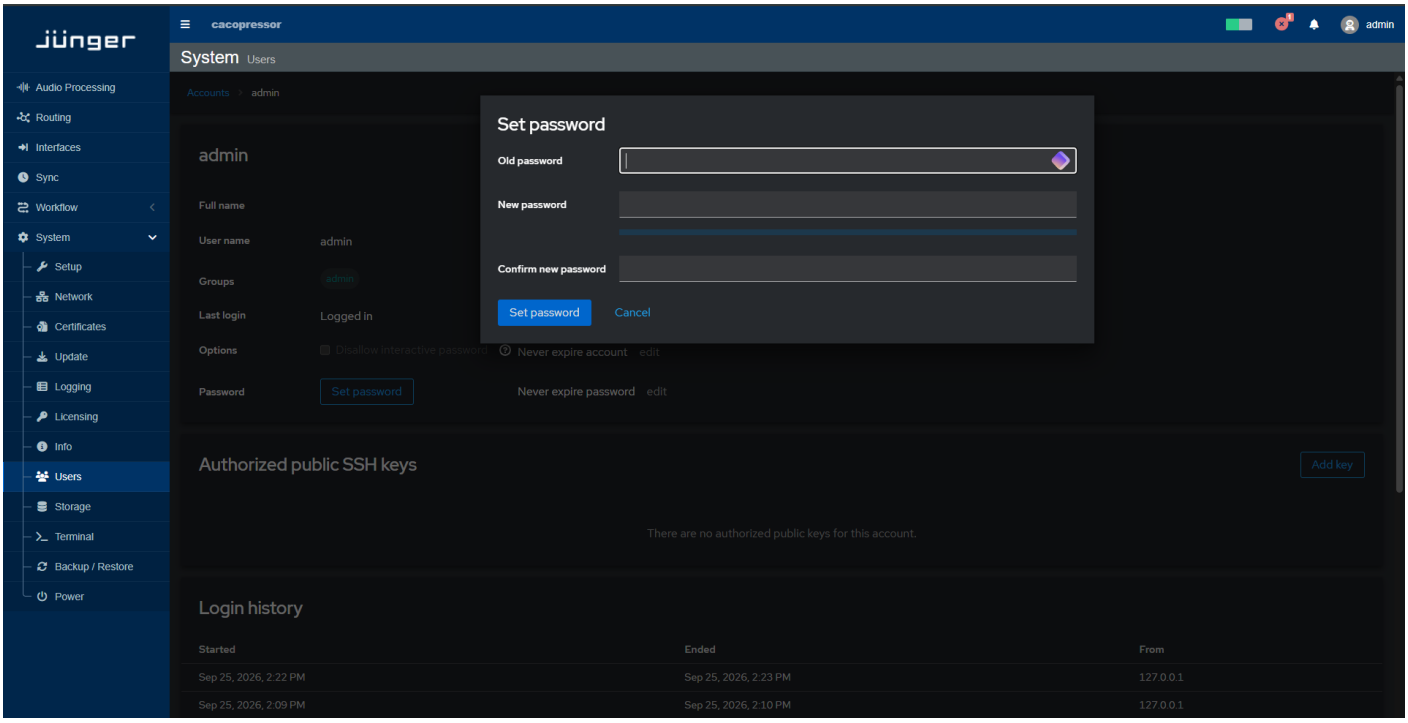

This article covers the available functions in the current version and will be updated as user management is extended in future releases.

Changing Passwords

To change the admin password:

1. Open the user menu in the upper-right corner of the Web UI.
2. Select the current user.
3. Click set password.
4. Enter the current admin password.
5. Enter and confirm the new password.
6. Save the changes.

> **Note -** Password must contain at least 10 characters, including at least: - one upper case letter - one lower case letter - one number - one special character
